## Introduction

The Explorer 15i/18i is a display with an integrated PC for installation in hazardous areas. It is equipped with intrinsically safe communication interfaces for connection of other components such as keyboard, mouse or barcode scanner.

Some of the interfaces and the power supply input are increased safety and accessed via an Ex e terminal enclosure.

When the Explorer 15i/18i is correctly mounted into a min. IP6X certificated housing (with a cut out of 417mm x 328,5mm resp. 16,43"x12,94" for Explorer 15i or 476mm x 396mm resp. 18,75"x15,6" Explorer 18i) installation in a zone 21 is permitted.

## Variants of the Explorer

The Explorer is available in two different variants:

<b>Explorer 15i</b>	(Display size appr. 15")
<b>Explorer 18i</b>	(Display size appr. 19")

The following options are available:

<b>Touch</b>	(Touch screen)
<b>G-Touch</b>	(Glass Touch screen)
<b>HB</b>	(High Brightness)
<b>BS</b>	(Brightness sensor)
<b>AC</b>	(100-240V AC 50/60Hz, max. 120W)
<b>DC</b>	(20-30V DC, max. 120W)
<b>5V is</b>	(5V is supply, e.g. to supply a BCS)

Additionally you can order interface options as below:

1x RS485 or RS422-Interface Ex e (instead the RS232 Ex e interface)

## Assembly

To ensure the ingress protection IP66 / NEMA 4X for the Explorer 15i/18i-module it must be correctly mounted in a min. IP66 / NEMA 4X certificated housing (with a cut out of 417mm x 328,5mm resp. 16,43"x12,94" for Explorer 15i or 476mm x 396mm resp. 18,75"x15,6" for Explorer 18i). See also drawings attached.

The use of the device in Zone 21 is permitted, when the Explorer 15i/18i correct mounted in a min. IP6X approved housing (with a cut out of 417mm x 328,5mm resp. 16,43"x12,94" for Explorer 15i or 476mm x 396mm resp. 18,75"x15,6" for Explorer 18i).

The Explorer 15i/18i-module is inserted into the housing cut-out with its front side to the exterior and fastened from the inside via a minimum of 18 mounting clips which are evenly distributed over the external circumference (for Explorer 15i) or via a minimum of 24 mounting bolts which are evenly distributed over the external circumference secured with nuts (for Explorer 18i) in such a way that the module is flush and tight fitting to the housing.

The electrical connections can be seen in the wiring diagram #30100358 or #30100399 and the Ex certificate.

We recommend using CAT7 installation cable for the connection of the Ethernet interface X53. The Ethernet interface of the Explorer should be connected to a switch or similar device. The data cable pairs should be drilled together and connected as short as possible to the terminals inside the Ex e connection box.

Follow the safety instructions at all times.

When the Device will be mounted to a FHP-Enclosure with coupling (MB) and STF please follow listed instructions:

1. Fix the STF pipe stand or EBF elbow stand to the floor or wall. Ensure that the floor or wall is strong enough to take the load of the FHP enclosure system.
2. Refer to drawing 10100251 in appendix for instructions on how to fit the MB coupling that connects the enclosure to the STF or EBF stands.
3. Using the 4 screws provided fit the FH or FHP enclosure to the MB coupling.

An earth bonding lead is pre-installed in the enclosure and connected to the main bonding stud. The other end of this earth lead is for connection to the M6 x 20 self tapping bolt inside the STF or EBF stand that locks the MB coupling in place. See drawing 10100251 for details.

Drawings of some variants are listed in the attachment.

Maximum torque for M4 nuts on studs of the front bezel: 3 Nm.

## Notes

Various drivers e.g. for the graphic card or I/O interfaces can be download at <http://emea.kontron.com/products/computeronmodules/etx/etxdc.html> for different operating systems. Please select "**DOWNLOADS**"

The touch screen option requires the operating system has to support USB-devices. Drivers can be downloaded at [http://210.64.17.162/web20/eg/Touch\\_Drives.html](http://210.64.17.162/web20/eg/Touch_Drives.html) for each of the different operating systems.

The RS232, RS422, RS485 Ex e interfaces require the operating system to support USB-devices. Drivers can be download at <http://www.ftdichip.com/Drivers/VCP.htm> (FT232B device) for each of the different operating systems. The RS485/422 is implemented by an internal conversion of the RS232 -Interface.

Depending on how the Explorer is installed the max. ambient temperature for the complete unit may be reduced when mounted in an additional housing.

To minimize external thermal load we recommend an all day shadowing of the device/complete unit at direct solar radiation.

Pay attention to heat dissipation when choosing housings and the location of the installation. The typical/maximum power consumption are 75W/120W -> 260BTU/410BTU.

Extremely low ambient temperatures can affect the display and cause it to darken slightly. High temperatures could affect the life time of the display.

The user is solely responsible for data storage security, backup and liability for any loss of data.

The exact type of delivered device (e.g. 100-240V AC or 24V DC) you can indicate via the nameplate and the Test Report.

To ensure correct function of integrated brightness regulator the contacts X45-1 and X45-2 must be bridged. When used a external brightness regulator or brightness sensor they have to be connected to X45-1 and X45-2 instead of the bridge. X45-1 and X45-2 must be wired every time.

## Software installation

The Explorer will be delivered with or without operating system due to the order specs.

**Following described the installation process for an operating system. The installation is realized via a USB-CD/DVD drive.**

The USB-CD/DVD drive must be connected to the USB interface X52 at the Explorer connection box. You can use a USB-cable (cut and strip the cable) and connect it regarding the described terminal connection.

The external USB-CD/DVD drive must be powered externally.

The connection of a non intrinsically safe USB-CD/DVD drive (or similar) to the intrinsically safe USB interfaces X35 to X38 are not permitted!

When power on the Explorer you have to enter the BIOS by pressing "delete" during the booting process.

You have put the "USB-CDROM" to the first boot priority in the menu "BOOT". When you do not see the correct name of your USB-CD/DVD drive behind the "USB-CDROM:" (e.g. "USB-CDROM: Manufacturer abc123") the device are not correct indicated. Depend of the used USB-CD/DVD drive maybe helpful to connect the USB-cable not until starting the boot process or (for the 2.Generation of Explorer) disable USB controller 2.0 (select: Chipset / South bridge configuration / USB controller 2.0 / disable)

After saving the settings at the BIOS the Explorer will start from CD/DVD (the installation CD has to be in the drive). The standard installation process of Windows can be done now.

After completion the Windows installation we recommend to install the necessary drivers. Download the drivers listed in the chapter "Notes" and put them to a CD or USB-Memory-Stick.

We recommend installing the drivers for the Chipset (INF-files), for the graphic card and for the Ethernet in the listed order as minimum. Maybe restarts are necessary during the installation.

When the devices "Touch" or "RS232 Interface" (depend of the Explorer configuration) are detected during the installation, install the driver with the drivers you downloaded previously (pay attention in which device are detected!). Depend of the operating system the "RS232 Interface" will be detected two times. Then you have to install the driver two times.

You also can install the drivers later via the "Hardware manager".

Additional you have to install the Touch software. Execute the file "Setup.exe" (from Touch driver download). After installation you have to calibrate the Touch.

The installation is finished.

### Notes for BIOS-settings:

Ensure that you disabled the USB controller 2.0 (Select: Chipset / South bridge configuration / USB controller 2.0 / disable) for correct function with various USB-devices.

The touch should be redetected again after changing this setting.

Then you have to install the touch driver again.

Gecma does not recommend BIOS updates to avoid unexpected issues and guarantee a maximum of reliability.

## Technical Data

The device can be ordered with different technical specifications:

Prozessor:	Intel® ATOM™ N270, 1.6 GHz
Chipset:	Intel® 945GSE, 533 MHz FSB
DRAM:	DDR2 533 SODIMM up to 2048 MB
Cache:	512K 2 <sup>nd</sup> Level
Video:	Intel Intel® GMA950, Supports DX 9.0c
Resolution:	Explorer 15i 1024x768, 262 kB/16 Mio. colors Explorer 18i, 1280x1024, 16 Mio. colors
Ethernet:	10/100Base-T Intel® 82562V, IEEE 802.3
Serial Ex i	2x 16550 compatibel (RXD, TXD, RTS, CTS)
Serial Ex e	1x 16550 compatibel (RXD, TXD)
USB:	4x USB Ex i, 1x USB Ex e
Mass storage:	64 GB SSD up to 4x CF Cards (8 GB / 16 GB)
Optional:	
Sound:	AC97 controller, Intel 945GSE, line in/out, Mic
RS485 Ex e:	Half Duplex 2-wire RS485, up to 115.2K, auto TX enable, $R_{Line}=120\Omega$
RS422 Ex e:	4-wire (default) or auto TX, up to 115.2K

The manufacturer reserves the right to change technical data without notice in order to enhance the performance and take advantage of technical advances.

	Zone 1	Zone 21
International ignition protection:	II 2G Ex e mb [ia] IIC T4	II 2D Ex tD A21 IP6X T120°C
Operating temperature: (Certified range) (10 to 90% rel. humidity, n. c.)	Ta: -20°C ... +50°C (-4°F to 122°F)	Ta: -20°C ... +50°C (-4°F to 122°F)
Certificate:	IBExU 05 ATEX 1186 X	IBExU 05 ATEX 1186 X

Recommended operating temperature: 0...+45 °C, 10 to 90% rel. humidity, n. condens.

High ambient temperature will reduce the lifespan of the LCD display.

Low ambient temperatures could affect the picture quality.

Housing material:	Steel / Aluminum / Stainless Steel
Housing dimensions:	refer to drawings attached
Weight:	Explorer 15i appr. 20kg (appr. 44lb) Explorer 18i appr. 25kg (appr. 55lb)
Ingress Protection Encl.:	Front IP66 / NEMA 4X when mounted correctly.
Storage temperature:	-20 °C - +60°C (-4°F to 140°F), 10 to 90% rel. humidity, n. cond.

## Connection details

Supply voltage in:	<b>X50</b> , Terminal 1-2, Increased safety: 2 x (0,2-2,5)mm <sup>2</sup> / (24AWG-14AWG), single- and multi-strand Um max. 250V / 1500A Cable gland M16 for round cable, Outer cable diameter 5,5...10mm (0,22" ...0,39")
Supply voltage out:	<b>X50</b> , Terminal 3-4, Increased safety: 2 x (0,2-2,5)mm <sup>2</sup> / (24AWG-14AWG), single- and multi-strand Cable gland M16 for round cable, Outer cable diameter 5,5...10mm (0,22" ...0,39")
Serial Interface:	<b>X51</b> , Terminal 1-4, Increased safety: 4 x (0,2-2,5)mm <sup>2</sup> / (24AWG-14AWG), single- and multi-strand Um max. 250V / 1500A Cable gland M12 for round cable, Outer cable diameter 4...7mm (0,16" ...0,28") Recommended max. cable length 15m (50ft) für RS232 Recommended max. cable length 1000m (3300ft) for RS485/422 Pay attention to the values listed in corresponding standards.
USB Interface:	<b>X52</b> , Terminal 1-4, Increased safety: 4 x (0,2-2,5)mm <sup>2</sup> / (24AWG-14AWG), single- and multi-strand Um max. 250V / 1500A Cable gland M12 for round cable, Outer cable diameter 4...7mm (0,16" ...0,28") Recommended max. cable length 5m (16,4ft) Pay attention to the values listed in corresponding standards.
Ethernet Interface:	<b>X53</b> , Terminal 1-9, Increased safety: 9 x (0,2-2,5)mm <sup>2</sup> / (24AWG-14AWG), single- and multi-strand Um max. 250V / 1500A Cable gland M12 for round cable, Outer cable diameter 4...7mm (0,16" ...0,28") Recommended max. cable length 100m (330ft) Pay attention to the values listed in corresponding standards.

Keyboard Interface:

**X33**, Terminal 1-6, Intrinsically safe ia:  
Mini DIN 6pol Jack

$U_i \leq 5,5V$   
 $I_i \leq \text{not important}$   
 $P_i \leq \text{not important}$   
 $L_i \leq \text{negligible}$   
 $C_i \leq \text{negligible}$

$U_o \leq 5,5 V$   
 $I_o \leq 195mA$   
 $P_o \leq 560mW$   
 $L_o \leq 0,7mH$   
 $C_o \leq 50uF$

Recommended max. cable length 2m (6,5ft)  
Pay attention to the values listed in corresponding standards.

Mouse Interface:

**X34**, Terminal 1-6, Intrinsically safe ia:  
Mini DIN 6pol Jack

$U_i \leq 5,5V$   
 $I_i \leq \text{not important}$   
 $P_i \leq \text{not important}$   
 $L_i \leq \text{negligible}$   
 $C_i \leq \text{negligible}$

$U_o \leq 5,5 V$   
 $I_o \leq 71 mA$   
 $P_o \leq 195 mW$   
 $L_o \leq 7mH$   
 $C_o \leq 50uF$

Recommended max. cable length 2m (6,5ft)  
Pay attention to the values listed in corresponding standards.

USB1i Interface:

**X35**, Terminal 1-4, Intrinsically safe ia:  
USB Type A Jack

$U_i \leq 5,5 V$   
 $I_i \leq \text{not important}$   
 $P_i \leq \text{not important}$   
 $L_i \leq \text{negligible}$   
 $C_i \leq \text{negligible}$

$U_o \leq 5,5 V$   
 $I_o \leq 1,04 A$   
 $P_o \leq 2,64 W$   
 $L_o \leq 40uH$   
 $C_o \leq 50uF$

Recommended max. cable length 2m (6,5ft)  
Pay attention to the values listed in corresponding standards.

USB2i Interface:

**X36**, Terminal 1-4, Intrinsically safe ia:  
USB Type A Jack

$U_i \leq 5,5 \text{ V}$   
 $I_i \leq \text{not important}$   
 $P_i \leq \text{not important}$   
 $L_i \leq \text{negligible}$   
 $C_i \leq \text{negligible}$

$U_o \leq 5,5 \text{ V}$   
 $I_o \leq 1,04 \text{ A}$   
 $P_o \leq 2,64 \text{ W}$   
 $L_o \leq 40\mu\text{H}$   
 $C_o \leq 50\mu\text{F}$

Recommended max. cable length 2m (6,5ft)  
Pay attention to the values listed in corresponding standards.

USB3i Interface:

**X37**, Terminal 1-4, Intrinsically safe ia:  
USB Type A Jack

$U_i \leq 5,5 \text{ V}$   
 $I_i \leq \text{not important}$   
 $P_i \leq \text{not important}$   
 $L_i \leq \text{negligible}$   
 $C_i \leq \text{negligible}$

$U_o \leq 5,5 \text{ V}$   
 $I_o \leq 1,04 \text{ A}$   
 $P_o \leq 2,64 \text{ W}$   
 $L_o \leq 40\mu\text{H}$   
 $C_o \leq 50\mu\text{F}$

Recommended max. cable length 2m (6,5ft)  
Pay attention to the values listed in corresponding standards.

USB4i Interface:

**X38**, Terminal 1-4, Intrinsically safe ia:  
USB Type A Jack

$U_i \leq 5,5 \text{ V}$   
 $I_i \leq \text{not important}$   
 $P_i \leq \text{not important}$   
 $L_i \leq \text{negligible}$   
 $C_i \leq \text{negligible}$

$U_o \leq 5,5 \text{ V}$   
 $I_o \leq 1,04 \text{ A}$   
 $P_o \leq 2,64 \text{ W}$   
 $L_o \leq 40\mu\text{H}$   
 $C_o \leq 50\mu\text{F}$

Recommended max. cable length 2m (6,5ft)  
Pay attention to the values listed in corresponding standards.

COM1i Interface:

**X39**, Terminal 1-9, Intrinsically safe ia:  
SUB-D 9pol. plug

$U_i \leq \pm 25 \text{ V}$   
 $I_i \leq \text{not important}$   
 $P_i \leq \text{not important}$   
 $L_i \leq \text{negligible}$   
 $C_i \leq \text{negligible}$

$U_o \leq \pm 5,5 \text{ V}$   
 $I_o \leq 24 \text{ mA}$   
 $P_o \leq 32 \text{ mW}$   
 $L_o \leq 50 \text{ mH}$   
 $C_o \leq 50 \text{ }\mu\text{F}$

Recommended max. cable length 15m (50ft)  
Pay attention to the values listed in corresponding standards.

COM2i Interface:

**X40**, Terminal 1-9, Intrinsically safe ia:  
SUB-D 9pol. plug

$U_i \leq \pm 25 \text{ V}$   
 $I_i \leq \text{not important}$   
 $P_i \leq \text{not important}$   
 $L_i \leq \text{negligible}$   
 $C_i \leq \text{negligible}$

$U_o \leq \pm 5,5 \text{ V}$   
 $I_o \leq 24 \text{ mA}$   
 $P_o \leq 32 \text{ mW}$   
 $L_o \leq 50 \text{ mH}$   
 $C_o \leq 50 \text{ }\mu\text{F}$

Recommended max. cable length 15m (50ft)  
Pay attention to the values listed in corresponding standards.

Line out Interface:

**X42**, Terminal 1-3, Intrinsically safe ia:  
Stereo jack 3,5mm

$U_i \leq 5,5 \text{ V}$   
 $I_i \leq \text{not important}$   
 $P_i \leq \text{not important}$   
 $L_i \leq \text{negligible}$   
 $C_i \leq \text{negligible}$

$U_o \leq 5,5 \text{ V}$   
 $I_o \leq 618 \text{ mA}$   
 $P_o \leq 852 \text{ mW}$   
 $L_o \leq 100\text{ }\mu\text{H}$   
 $C_o \leq 50 \text{ }\mu\text{F}$

Recommended max. cable length 2m (6,5ft)  
Pay attention to the values listed in corresponding standards.

Line in Interface:

**X43**, Terminal 1-3, Intrinsically safe ia:  
Stereo jack 3,5mm

$U_i \leq 5,5 \text{ V}$   
 $I_i \leq \text{not important}$   
 $P_i \leq \text{not important}$   
 $L_i \leq \text{negligible}$   
 $C_i \leq \text{negligible}$

$U_o \leq 5,5 \text{ V}$   
 $I_o \leq 618 \text{ mA}$   
 $P_o \leq 852 \text{ mW}$   
 $L_o \leq 100\mu\text{H}$   
 $C_o \leq 50 \mu\text{F}$

Recommended max. cable length 2m (6,5ft)  
Pay attention to the values listed in corresponding standards.

Mic Interface:

**X44**, Terminal 1-3, Intrinsically safe ia:  
Stereo jack 3,5mm

$U_i \leq 5,5 \text{ V}$   
 $I_i \leq \text{not important}$   
 $P_i \leq \text{not important}$   
 $L_i \leq \text{negligible}$   
 $C_i \leq \text{negligible}$

$U_o \leq 5,5 \text{ V}$   
 $I_o \leq 618 \text{ mA}$   
 $P_o \leq 852 \text{ mW}$   
 $L_o \leq 100\mu\text{H}$   
 $C_o \leq 50 \mu\text{F}$

Recommended max. cable length 2m (6,5ft)  
Pay attention to the values listed in corresponding standards.

Ext. 12V Interface:

**X45**, Terminal 3-4, Intrinsically safe ia: (Standard)  
Phoenix DFK-MSTBVA 2,5/4-G-5,08 jack

$U_i \leq 12,5 \text{ V}$   
 $I_i \leq \text{not important}$   
 $P_i \leq \text{not important}$   
 $L_i \leq \text{negligible}$   
 $C_i \leq \text{negligible}$

$U_o \leq 12,5 \text{ V}$   
 $I_o \leq 541 \text{ mA}$   
 $P_o \leq 2,29 \text{ W}$   
 $L_o \leq 0,08 \text{ mH}$   
 $C_o \leq 1 \mu\text{F}$

Recommended max. cable length 2m (6,5ft)

Ext. 5V Interface:

**X45**, Terminal 3-4, Intrinsically safe ia 5Vis: (Option)  
Phoenix DFK-MSTBVA 2,5/4-G-5,08 jack

$U_i \leq 5,5 \text{ V}$   
 $I_i \leq \text{not important}$   
 $P_i \leq \text{not important}$   
 $L_i \leq \text{negligible}$   
 $C_i \leq \text{negligible}$   
 $U_o \leq 5,4 \text{ V}$   
 $I_o \leq 420 \text{ mA}$   
 $P_o \leq 1,25 \text{ W}$   
 $L_o \leq 0,15 \text{ mH}$   
 $C_o \leq 50 \text{ uF}$

Recommended max. cable length 2m (6,5ft)

BS Interface:

**X45**, Terminal 1-2, Intrinsically safe ia:  
Phoenix DFK-MSTBVA 2,5/4-G-5,08 jack

$U_i \leq 5,5 \text{ V}$   
 $I_i \leq \text{not important}$   
 $P_i \leq \text{not important}$   
 $L_i \leq \text{negligible}$   
 $C_i \leq \text{negligible}$   
 $U_o \leq 5,5 \text{ V}$   
 $I_o \leq 36 \text{ mA}$   
 $P_o \leq 50 \text{ mW}$   
 $L_o \leq 25 \text{ mH}$   
 $C_o \leq 50 \text{ uF}$

Recommended max. cable length 2m (6,5ft)

**Further details can be found in the Ex certificate.**

## Terminal Connections

### Supply circuit **X50**

Connection	Significance	
	100-240V AC	24V DC
X50-1	Supplycircuit L	Supplycircuit +24V DC
X50-2	Supplycircuit N	Supplycircuit 0V DC
X50-3	Outputcircuit L	Outputcircuit +24V DC
X50-4	Outputcircuit N	Outputcircuit 0V DC

The devices are supplied via the Supply circuit. The Output circuit are integrated to supply optional other devices. The Supply circuit and the Output circuit are connected parallel.

### Serial Interface (RS232 or RS485 or RS422) **X51**

Connection	Significance		
	RS232	RS485	RS422
X51-1	GND	485-	RX-
X51-2	RXD	485+	RX+
X51-3	TXD	GND	TX-
X51-4			TX+

### USB Interface **X52**

Connection	Significance	
	Signal	Preferred color
X52-1	+UB	rd
X52-2	D-	wh
X52-3	D+	gn
X52-4	GND	bk

### Ethernet 10/100 Interface **X53**

Connection	Significance		
	Signal	Preferred colour	Preferred colour CH
X53-1	(1) TX+	wh/or	bk
X53-2	(2) TX-	or	gn
X53-3	(3) RX+	wh/gn	rd
X53-4	(4)	bl	wh
X53-5	(5)	wh/bl	bl
X53-6	(6) RX-	gn	or
X53-7	(7)	wh/br	ye
X53-8	(8)	br	br
X53-9	Shield	Shield	Shield

#### Keyboard Interface **X33**

Connection	Significance
X33-1	Data
X33-3	GND
X33-4	+UB
X33-5	Clock

X38-4	GND
Cable Screen	GND

#### COM1i RS232 Interface **X39**

Connection	Significance
X39-2	RXD
X39-3	TXD
X39-5	GND
X39-7	RTS
X39-8	CTS
Cable Screen	GND

#### COM2i RS232 Interface **X40**

Connection	Significance
X40-2	RXD
X40-3	TXD
X40-5	GND
X40-7	RTS
X40-8	CTS
Cable Screen	GND

#### Audio Line out Interface **X42**

Connection	Significance
X42-1	GND
X42-2	Line out R
X42-3	Line out L

#### Audio Line in Interface **X43**

Connection	Significance
X43-1	GND
X43-2	Line in R
X43-3	Line in L

#### Audio Mic Interface **X44**

Connection	Significance
X44-1	GND
X44-2	MIC Bias
X44-3	Mic

#### Ext. 12V Interface **X45** (standard)

Connection	Significance
X45-2	GND
X45-3	GND
X45-4	12V DC

Ext. 5V Interface **X45** (option)

Note: When used the 5V is option the external 12V interface on X45 not available.

Connection	Significance
X45-2	GND
X45-3	GND
X45-4	5V DC

Brightness sensor (BS) Interface **X45**

Connection	Significance
X45-1	BS
X45-2	GND
X45-3	GND

The terminal numbers are written on terminal labels close to the appropriate the terminal.

Terminal numbers that are not listed mean the appropriate option is not fitted.

For further details refer the wiring diagram #30100358 or #30100399 and the Ex certificate.

# Safety Instructions

## General Safety Instructions

The instructions stated in this chapter are to be followed accurately to ensure safe and reliable operation.

The license and the special conditions included in it are to be observed.

Follow any national safety regulations and the accident prevention regulations.

The installation is only to be performed by specialists. These specialist must be familiar with the technical requirements and conditions of potentially explosive atmospheres.

Incorrect or inadmissible application as well as non-observance of the instructions in this operating manual invalidate the warranty.

Only use this device for the approved purpose.

Conversions and modifications to the device are not allowed.

The housing is only to be opened by the company Gecma Components GmbH.

## Assembly

The appropriate national installation and maintenance regulations are to be observed.

The generally accepted rules of engineering "good practice" are to be observed.

The entire equipment is to be connected and operated correctly and properly according to the applicable standards, guidelines and installation instructions.

The housing is to be grounded via grounding equipment. Grounding must be effected with a core cross section of at least 4mm<sup>2</sup>. For external devices, except USB-devices, equipotential bonding must be guaranteed.

Shielded cables are recommended for use in combination with this device.

Connect the device via the Ex e terminal enclosure when complete de-energized. Do not open the terminal enclosure when the device is powered and live. Ensure the power supply is isolated. The cable diameter has to comply to the specification of the terminals. The outer diameter of the cables has to comply to the specification of the cable glands. Tighten the Cable glands according to the rules. Seal not used Cable glands. The Cable glands of the Ex e terminal enclosure have to comply to the national standards and have to be interchanged if necessary.

The intrinsically safe circuits or the device with supply and signal lines have to be installed in such a way that no faults can occur between the individual circuits, ensure the installation is in accordance with IEC 60079-14, 12.2.2.8.

If the device has to be replaced in a dust atmosphere, the unit and/or the housing, in which the device is installed, is to be de-energized first and if necessary cooled according to the regulations. Before opening the device and/or housing and during the period in which the device and/or the housing is open, the environment of the device and/or housing has to be kept dust-free to such an extent that no dust can enter the interior of the housing. When installing a new device observe that all seals are in a flawless condition and function properly.

Before putting the device into operation make sure that the device has been installed as prescribed and that the device and its wiring are not damaged.

If the power supply of the device is not intrinsically safe, the license will become void and it must not be operated as an intrinsically safe device. If the device was operated intrinsically safely with a low level of international protection (e.g. ib), it must not be operated afterwards in applications for a higher level of international protection (e.g. ia).

## Operation

The device is only to be operated in an undamaged and clean condition. When installed in dust hazardous areas 2D/3D only clean the device with a wet cloth.

If the device has suffered any damage which might affect the international Ex protection (e.g. cracks, holes or broken components) it must be taken out of service immediately. The device can only be put into operation again after the defective parts have been replaced.

When the device is damaged, do not touch it at all due to the risk of injury!

If the device is to be used in a dust atmosphere dust layers >5mm have to be removed.

Ensure that static electricity cannot build up on the surface of the device by not installing in an area where pneumatic powder transport systems can blow across the device.

In the event of non-observance & non-compliance the stipulated explosion protection cannot be guaranteed and/or the warranty will become invalid!

Modifications require the written approval by the company GeCma Components electronic GmbH.

# General Instructions

Before starting the installation read the entire operating manual!

In cases of doubt (in the form of mistranslation) the German operating manual is to be referred to. We do not assume liability for misprints and errors in this operating manual.

Should you have any questions or suggestions please feel free to contact us any time:

## **GeCma Components electronic GmbH**

## **Technical progress**

The manufacturer reserves the right to change technical data without notice.

## **Repair work, hazardous material**

The description of the fault(s) should be included with the devices which are returned to GeCma Components electronic GmbH or their agent for repair.

The following measures are to be taken before sending a device in for repair:

Please clean the device thoroughly and remove any residue from surfaces.  
Pay special attention to sealing grooves and gaps which might contain harmful residue. We have to ask you to refrain from sending the device back if it is impossible for you to definitely guarantee that all harmful material has been completely removed.

Costs which arise due to inadequate cleaning of the device for a potential disposal or for personal injury (cauterisation or burns etc.) will be charged to the proprietor of the device.

## **Used trademarks**

EG-BAUMUSTERPRÜFBESCHEINIGUNG  
gemäß Richtlinie 94/9/EG, Anhang III

Geräte und Schutzsysteme zur bestimmungsgemäßen Verwendung  
in explosionsgefährdeten Bereichen, Richtlinie 94/9/EG

EG-Baumusterprüfbescheinigungsnummer: IBExU05ATEX1186 X

Gerät: EXPLORER 15i/18i

Hersteller: Gecma Components GmbH

Anschrift: Heisenbergstr. 26-40  
50169 Kerpen  
Germany

Die Bauart des unter [4] genannten Gerätes sowie die verschiedenen zulässigen Ausführungen  
sind in der Anlage zu dieser EG-Baumusterprüfbescheinigung festgelegt.

IBExU Institut für Sicherheitstechnik GmbH, BENANNTE STELLE Nr. 0637 nach Artikel 9 der  
Richtlinie 94/9/EG des Europäischen Parlaments und des Rates vom 23. März 1994, bescheinigt,  
dass das unter [4] genannte Gerät die in Anhang II der Richtlinie festgelegten grundlegenden Si-  
cherheits- und Gesundheitsanforderungen für die Konzeption und den Bau des Gerätes zur be-  
stimmungsgemäßen Verwendung in explosionsgefährdeten Bereichen erfüllt.  
Die Prüfergebnisse sind in dem Prüfbericht IB-05-3-340 vom 07.02.2006 festgehalten.

Die grundlegenden Sicherheits- und Gesundheitsanforderungen werden erfüllt durch Übereinstim-  
mung mit EN 60079-0:2004, EN 60079-7:2003, E IEC 60079-11:2004 (31G/132A/CD), EN 60079-  
18:2004, prEN 61241-0:2002 und EN 61241-1:2004).

Falls das Zeichen „X“ hinter der Bescheinigungsnummer steht, wird auf besondere Bedingungen  
für die sichere Anwendung des Gerätes in der Anlage zu dieser EG-Baumusterprüfbescheinigung  
unter [17] hingewiesen.

Diese EG-Baumusterprüfbescheinigung bezieht sich nur auf die Konzeption und den Bau des fest-  
gelegten Gerätes. Weitere Anforderungen dieser Richtlinie gelten für die Herstellung und das In-  
verkehrbringen dieses Gerätes.

Die Kennzeichnung des unter [4] genannten Gerätes muss die folgenden Angaben enthalten:

II 2G Ex e mb [ia] IIC T4  
-20 °C ≤ T<sub>a</sub> ≤ +50 °C

Bei einem sachgerechten Einbau des Gerätes in ein Gehäuse mit bestätigter Schutzart ≥ IP 6X  
kann zusätzlich wie folgt gekennzeichnet werden:

II 2D Ex td A21 IP 6X T 120 °C

zur EG-BAUMUSTERPRÜFBESCHEINIGUNG IBExU05ATEX1186 X

Beschreibung des Gerätes

Die EXPLORER 15i/18i sind Schalttafelbaugeräte zur Verwendung in explosionsgefährdeten  
Bereichen und stellen Steuerfunktionen mittels Bildschirm dar. Sie haben Anschlussmöglichkeiten  
für Ethernet-, COM- und USB-Datenübertragung sowie eigensicheres Zubehör. Die Geräte in un-  
terschiedlichen Abmessungen bestehen aus vergossenen Metallgehäusen mit Sicherheitsglas-  
scheibe und beinhalten einen LCD-Bildschirm, eigensicheren Touch, Stromversorgungen, CPU,  
Harddisk sowie Barrieren für eigensichere Schnittstellen.

Ausführungen:

Explorer 15i (Displaygröße ca. 15")  
Explorer 18i (Displaygröße ca. 19")

Folgende Optionen sind jeweils möglich:

Touch (Touchscreen)  
G-Touch (Glas Touchscreen)  
HB (High Brightness)  
BS (Brightnesssensor)  
AC (100 - 240 V AC 50/60 Hz, max. 120 W)  
DC (20 - 30 V DC, max. 120 W)

Umgebungstemperaturbereich:  
-20 °C bis +50 °C  
Schutzart des Gehäuses:  
IP 6X frontseitig  
IP 20 rückseitig

Elektrische Daten

Versorgungsspannung

für DC Version  
(KI. X50) 20-30 V DC ± 10 %  
für AC Version  
(KI. X50) bis 6 A  
100 - 240 V AC ± 10 %  
bis 1,2 A

COM-Schnittstelle  
(KI. X51) bis 30 V AC/DC

USB-Schnittstelle  
(KI. X52) bis 5 V AC/DC

Ethernet Interface  
(KI. X53) bis 5 V AC/DC

Bemessungsspannung U<sub>m</sub> 253 V

Eigensichere Daten- und Versorgungsstromkreise in Zündschutzart Ex ia IIC

Externe Taster (KI. X33)

U <sub>i</sub>	5,5 V	U <sub>0</sub>	5,5 V
I <sub>n</sub>	intern begrenzt	I <sub>0</sub>	195 mA
P <sub>n</sub>	intern begrenzt	P <sub>0</sub>	0,560 W
L <sub>i</sub>	vernachlässigbar	L <sub>0</sub>	0,7 mH
C <sub>i</sub>	vernachlässigbar	C <sub>0</sub>	50 µF

[17] **Besondere Bedingungen**  
Die eigensicheren Stromkreise und das Gehäuse sind galvanisch verbunden. Im gesamten Verlauf der Errichtung der eigensicheren Stromkreise, ausgenommen der USB-Schnittstellen (X35...X38), muss Potentialausgleich bestehen.  
Bei Verwendung nach Kategorie 2D/3D sind hochenergetische Lademechanismen an der Bedienoberfläche der Visualisierungseinheiten bzw. des Zubehörs (z. B. pneumatischer Partikeltransport) bei der Anwendung auszuschließen.  
Bei Verwendung nach Kategorie 2D/3D muss die IP-Schutzart durch den sachgerechten Einbau in ein IP-6X-Gehäuse gewährleistet sein.

[18] **Grundlegende Sicherheits- und Gesundheitsanforderungen**  
Erfüllt durch Einhaltung von Normen (siehe [9]).

[16] **Prüfbericht**  
Der Nachweis des Explosionsschutzes ist im Detail im Prüfbericht IB-05-3-340 dargelegt.

**Zusammenfassung der Prüfergebnisse**  
Die EXPLORER 15i/18i erfüllen die Anforderungen des Explosionsschutzes für Gerätegruppe II und der Geräteklasse 2G bzw. 2D in Zündschutzart Vergusskapselung in Verbindung mit Erhöhter Sicherheit bzw. Eigensicherheit und Schutz durch Gehäuse für Gase der Explosionsgruppe IIC und der Temperaturklasse T4 bzw. einer Oberflächentemperatur von max. 120 °C.  
Das Gerät erfüllt die Schlagfestigkeitsprüfung nach EN 60079-0:2004 Tabelle 8 für Gruppe II mit hoher mechanischer Gefährdung.

EC-TYPE EXAMINATION CERTIFICATE

according to Directive 94/9/EC, Annex III  
(Translation)

- [1] Equipment and Protective Systems intended for use in Potentially Explosive Atmospheres, Directive 94/9/EC
- [2] EC-Type Examination Certificate Number: **IBEXU05ATEX1186 X**
- [3] Equipment: EXPLORER 15i/18i
- [4] Manufacturer: Gecma Components GmbH
- [5] Address: Heisenbergstr. 26-40  
50169 Kerpen  
Germany

[7] The equipment mentioned under [4] and any acceptable variation there to are specified in the schedule to this EC-Type Examination Certificate.

[8] IBExU Institut für Sicherheitstechnik GmbH, NOTIFIED BODY number 0637 in accordance with article 9 of the Council Directive 94/9/EC of 23<sup>rd</sup> March 1994, certifies that the under [4] mentioned equipment has been found to comply with the Essential Health and Safety Requirements relating to the design and construction of the equipment intended for use in potentially explosive atmospheres given in Annex II to the Directive.

The examination and test results are recorded in test report IB-05-3-340 of 07<sup>th</sup> February 2006.

[9] Compliance with the Essential Health and Safety Requirements has been assured by compliance with EN 60079-0:2004, EN 60079-7:2003, EN 60079-18:2004, E IEC 60079-11:2004 (31G/132A/CD) and prEN 61241-0:2002, EN 61241-1:2004.

[10] If the sign "X" is placed after the certificate number, it indicates that the equipment is subject to special conditions for safe use specified under [17] in the schedule to this EC-Type Examination Certificate.

[11] This EC-Type Examination Certificate relates only to the design and construction of the specified equipment. If applicable, further requirements of this Directive apply to the manufacture and supply of this equipment.

[12] The marking of the equipment mentioned under [4] shall include the following:

Ⓢ II 2G Ex e mb [Ia] IIC T4  
-20 °C ≤ T<sub>a</sub> ≤ +50 °C

At a proper installation of the equipment into an enclosure with confirmed Degree of protection ≥ IP 6 X can in addition be marked as follows:

Ⓢ II 2D Ex tD A21 IP 6X T 120° C

Schedule

Schedule

[13] to EC-TYPE EXAMINATION CERTIFICATE **IBEXU05ATEX1186 X**

Description of the equipment

The EXPLORER 15i/18i are switchboard installation apparatus of equipment in hazardous areas to the use and represent control functions by means of screen. You have connectivity's for Ethernet, for COM and USB data transmission as well as intrinsically safe accessories. The devices of equipment in various dimensions from spilled metal cases with safety glass plate and contain a LCD screen, intrinsically safe touch, power supplies, CPU, hard disk as well as barriers for intrinsically safe interfaces.

Types:

**Explorer 15i** (Displaysize appr. 15")  
**Explorer 18i** (Displaysize appr. 19")

The following options are possible respectively:

**Touch** (Touchscreen)  
**G-Touch** (Glas Touchscreen)  
**HB** (High Brightness)  
**BS** (Brightnesssensor)  
**a.c.** (100 - 240 V a.c. 50/60 Hz, max. 120 W)  
**d.c.** (20 - 30 V d.c., max. 120 W)

Ambient temperature range: -20 °C to +50 °C  
Degree of protection of the enclosure: IP 6X front side  
IP 20 rear side

Electrical data

**Power supply circuit** for d.c. version  
(Terminal X50) 20 - 30 V d.c. ± 10 %  
for a.c. version (Terminal X50) 100 - 240 V a.c. ± 10 %  
(Terminal X50) to 1.2 A

**COM-Interface** (Terminal X51) to 30 V a.c./d.c.

**USB-Interface** (Terminal X52) to 5 V a.c./d.c.

**Ethernet Interface** (Terminal X53) to 5 V a.c./d.c.

[16] **Test Report**

The detailed verification of the explosion protection is recorded in the Test Report IB-05-3-340.

**Summary of test results:**

The EXPLORER 15/181 fulfil the requirements of explosion protection for the Equipment Group II and Category 2G respectively 2D in type of protection Encapsulation in combination with Increased safety respectively intrinsic safety and protection by enclosure for gases of the Explosion Group IIC and Temperature Class T4 respectively with a maximum surface temperature of maximum 120 °C.

The device fulfil the impacttest respective EN 60079-0:2004 table 8 for group II with high risk of mechanical danger.

[17]

**Special conditions**

The intrinsically safe circuits and the enclosure are galvanically connected. In the whole course of the formation of intrinsically safe circuits except for the USB-interfaces (X35...X38) equipotential bonding must be guaranteed.

For use respective category 2D/3D: High energy load mechanism on the operating surface of the Visual units respectively of equipment (for example pneumatic particle transport) have to be excluded.

For use respective category 2D/3D must be ensured the Degree of protection by proper mounting in an IP-6X enclosures.

[18]

**Essential health and safety requirements**

Confirmed by compliance of standards (see [9]).

By order

- [5] Ergänzungen / Änderungen  
Die Ergänzungen/Änderungen der Geräte entsprechend [2] im Vergleich mit den bereits beschleunigten  
Geräten betreffen im Einzelnen:
- a) Ein weiterer Sicherungstyp (Fa. Bussmann, Typ S500) soll integriert werden.
- b) Eine zusätzliche Option „5V is“ wird aufgenommen. An der Schnittstelle X45 3-4 stehen anstatt 12 V  
in der Standardversion jetzt 5 V als eigensichere Versorgungsspannung zur Verfügung.

- [6] Prüfbericht  
Der Nachweis des Explosionsschutzes der unter [2] genannten Geräte ist im Prüfbericht IB-07-3-293  
vom 25.09.2007 dargelegt. Die Prüfunterlagen sind Bestandteil des Prüfberichtes.

- Die hier unter [2] genannten Geräte EXPLORER 15i/18i erfüllen die Anforderungen des Explosions-  
schutzes für Gerätegruppe II und der Geräteklasse 2G bzw. 2D in Zündschutzart Vergusskapselung  
in Verbindung mit Erhöhter Sicherheit bzw. Eigensicherheit und Schutz durch Gehäuse für Gase der  
Explosionsgruppe IIC und der Temperaturklasse T4 bzw. einer Oberflächentemperatur von max.  
120 °C.

- [7] Prüfergebnis  
IBExU bescheinigt, dass die unter [2] genannten Geräte die in Anhang II der RL 94/9/EG festgelegten  
grundlegenden Sicherheits- und Gesundheitsanforderungen erfüllen durch Übereinstimmung mit  
EN 60079-0:2004, EN 60079-11:2007, EN 60079-7:2006, EN 60079-18:2004 sowie EN 61241-0:2006  
und EN 61241-1:2004.

In der Betriebsanleitung sind für die externe 5 V Schnittstelle (Kl. X45 3-4) folgende Daten genannt:

U <sub>i</sub>	5,5 V	U <sub>o</sub>	5,4 V
I <sub>i</sub>	intern begrenzt	I <sub>o</sub>	420 mA
P <sub>i</sub>	intern begrenzt	P <sub>o</sub>	1,25 W
L <sub>i</sub>	vernachlässigbar	L <sub>o</sub>	0,15 mH
C <sub>i</sub>	vernachlässigbar	C <sub>o</sub>	50 µF

Diese Ergänzung ist nur in Verbindung mit der EG-Baumusterprüfbescheinigung  
IBExU05ATEX1186 X vom 08.02.2006 gültig. Die genannten Besonderen Bedingungen sind  
weiterhin gültig.

Bescheinigungen ohne Unter-  
schrift und ohne Siegel haben  
keine Gültigkeit.  
Bescheinigungen dürfen nur  
unverändert weiterverbreitet  
werden.

Freiberg, 25.09.2007

- [1] 1<sup>st</sup> Addition to  
EC-TYPE EXAMINATION CERTIFICATE IBExU05ATEX1186 X  
according to Directive 94/9/EC, Annex III  
- Translation -

- [2] Equipment: EXPLORER 15i/18i
- [3] Manufacturer: Geoma Components GmbH
- [4] Address: Heisenbergstr. 26-40  
50169 Kerpen  
Germany

- [5] Additions / Alterations  
The additions / alterations of the equipment stated under [2] compared with the equipment already  
certified concern in particular:

- a) Another fuse type (Company Bussmann, type S500) shall be integrated.
- b) An additional option "5V is" is taken. At the interface X45 3-4 are instead of 12 V in the standard  
version now 5 V are available as intrinsically safe supply voltage.

- [6] Test Report  
The proof of the explosion protection of the equipment stated under [2] is documented in the Test  
Report IB-07-3-293 of 25<sup>th</sup> September 2007. The test documents are part of the Test Report.

- The under [2] stated equipment EXPLORER 15i/18i fulfils the requirements of explosion protection  
for the Equipment Group II and Category 2G respectively 2D in type of protection Encapsulation in  
combination with Increased safety respectively Intrinsic safety and Protection by enclosure for  
gases of the Explosion Group IIC and Temperature Class T4 respectively a surface temperature of  
maximum 120 °C.

- [7] Test result  
IBExU certifies, that the equipment stated under [2] fulfils the in Annex II of Directive 94/9/EC fixed  
Essential Health and Safety Requirements by compliance with EN 60079-0:2004, EN 60079-  
11:2007, EN 60079-7:2006, EN 60079-18:2004 as well as EN 61241-0:2006 and EN 61241-  
1:2004.

The following data for the external 5 V interface (Terminal X45 3-4) are given in the operator's  
manual:

U <sub>i</sub>	5,5 V	U <sub>o</sub>	5,4 V
I <sub>i</sub>	internal limited	I <sub>o</sub>	420 mA
P <sub>i</sub>	internal limited	P <sub>o</sub>	1,25 W
L <sub>i</sub>	negligible	L <sub>o</sub>	0,15 mH
C <sub>i</sub>	negligible	C <sub>o</sub>	50 µF

This addition is only valid in combination with the EC-Type Examination Certificate  
IBExU05ATEX1186 X of 08<sup>th</sup> February 2006. The mentioned special conditions keep their va-  
lidity.

ПО ЭКОЛОГИЧЕСКОМУ, ТЕХНОЛОГИЧЕСКОМУ И АТОМНОМУ НАДЗОРУ

## РАЗРЕШЕНИЕ

№ PPC 00-045365

## На применение

Оборудование (техническое устройство, материал): Взрывозащищенные компьютерные терминалы Gesma Challenger и панельные компьютеры Gesma Explorer с комплектующими компонентами.

Код ОКП (ТН ВЭД): 40 0000 (8471 60 700 0, 8504 40 900 9).

Изготовитель (поставщик): Изготовитель: фирма "GeSta Components GmbH" (Германия); поставщик: Закрытое акционерное общество "ВСП Лимитед" (г. Москва, ул. Большая Почтовая, 22 блок 2).

Основание выдачи разрешения: Техническая документация, сертификат соответствия МОС "Сертиум" № РОСС DE.ME92.B02540 от 17.08.2011 г., протокол экспертизы технической документации, проверок конструкции и испытаний № 186ME-2011 от 01.08.2011 г.

**Условия применения:**

1. Разрешено применение во взрывоопасных зонах помещений и наружных установок, согласно маркировке взрывозащиты, ГОСТ Р 51330.13-99 (МЭК 60079-14-96), гл. 7.3 ПУЭ и в соответствии с отраслевыми нормами и правилами безопасности.
2. Внесение изменений в конструкцию технических устройств возможно только по согласованию с Федеральной службой по экологическому, технологическому и атомному надзору.

Срок действия разрешения до 03.10.2016

Дата выдачи 03.10.2011

Заместитель руководителя  
С.Г. Радионова

# beschreibt beliebige Character, welche keinen Einfluss auf den Explosionsschutz bzw. das ATEX Zertifikat haben /  
# describes free signs which have no effect to the hazardous protection resp. the ATEX certificate.

\$ Note on EMC. Under radiated immunity testing the 22i-FMO, some visible disturbances can be seen on the display, but this does not obscure any displayed content.  
This would be considered Criterion B pass.

Das jeweilige Zertifikat ist Bestandteil der Konformitätserklärung welcher weitere Details zu entnehmen sind /  
The respective certificate is a part of this declaration of conformity and should be referred to for further details.

Die oben beschriebenen Gegenstände der Erklärung erfüllen die Vorschriften der Richtlinie 2011/65/EU des Europäischen Parlaments und des Rates vom 8. Juni 2011 zur Beschränkung der Verwendung bestimmter gefährlicher Stoffe in Elektro- und Elektronikgeräten. /

The objects of the declaration described above is in conformity with Directive 2011/65/EU of the European Parliament and of the Council of 8 June 2011 on the restriction of the use of certain hazardous substances in electrical and electronic equipment.

Die Überwachung des QS Systems gemäß der RL 94/9/EG Anhang IV wird durchgeführt durch: /  
The surveillance of the quality system according to Directive 94/9/EG Annex IV is carried out by:

TÜV Rheinland No. 0035

S. Parfitt
